

## **iOS Mobile Developer**

When the time is right...

If you're ready to innovate and lead in the digital space, join Balance Software. We bring together technology and process expertise to deliver one-stop solutions that enable our clients products and services. We are responsible for developing and deploying seamless, tailored experiences to our clients. Working with our organization will be rewarding, challenging, and most definitely not be just another job. This group has helped create solutions covering a broad range of industries.

Our Offer...

When you join Balance Software, you get the opportunity to work on an array of cutting edge industry offerings – mobile, application design, iOS, Mac OSX, iPhones, iPad, iPod, Android and many more innovative platforms. Not only is the technology you get to work on amazing but your work is seen and loved by thousands of people around the world. Add in an amazing team, collaborative environment, and great engineering culture you get a winning situation at Balance Software.

As our iOS Mobile Developer, you will play an integral role in connecting Balance Software to clients worldwide by enabling them to view and analyze via their mobile applications and on the web.

### **In This Role, You Will Be**

Contributing ideas to and developing components of the Balance Software+ product suite ranging from custom sensors and devices to award winning mobile experiences.

Collaborate with team members at Balance Software to develop and analyze client requirements, transform them into implementable components, and deliver inspirational new features to our customers.

### **Desired Experience**

Fluent understanding of multiple web development languages including JavaScript, HTML, CSS and XML

Experience developing web services and interacting with REST based services

2 years hands-on agile/Scrum experience

Background in using Instruments to optimize an application

## What We're Looking For

- 5 years' experience developing mobile applications on the iOS platform
- Must have created a consumer facing application from start to finish and deployment in the App Store.
- Strong background in creating high-end presentation layers using a combination of Core Animation, OpenGL, and UIKit
- Experience working with designers to implement their UI design
- Deep expertise in Object Oriented analysis and design, Classic design patterns and Enterprise patterns
- Successful track record collaborating with product owners, product managers and business Subject Matter Experts to ensure delivered solutions optimally support the achievement of business outcomes.
- Bachelors' degree in Computer Science or a related field, with 2 years additional relevant professional experience accepted in lieu of a degree
- Ability to pass a 7 year background investigation
- If remote, connecting to Portland (Oregon), Balance Software's World Headquarters is required.
